

Boreal shrubland

ALASKA, USA

CREDIT: KRISTINA J. ANDERSON-TEIXEIRA

Vegetation

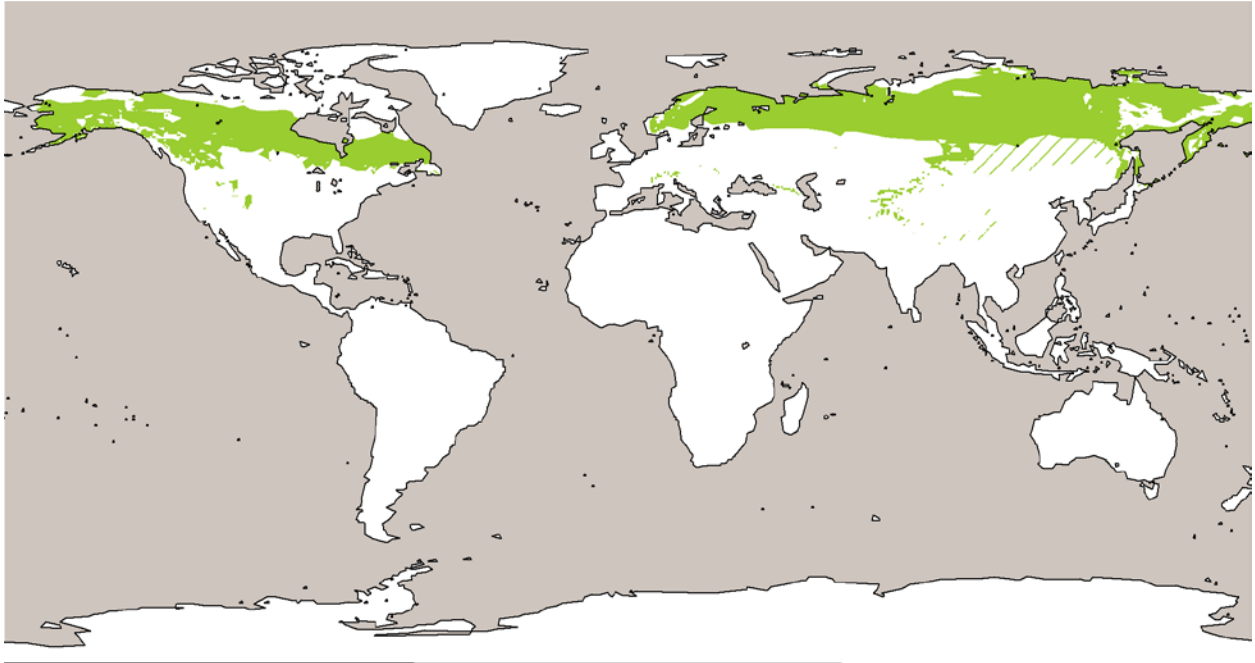

Boreal shrublands are dominated by shrubs.

Climate

Boreal shrublands are found in boreal or continental subarctic climate zones, represented by 6 climate zones defined by the Köppen-Geiger climate system: Dfc, Dfd, Dsc, Dsd, Dwc, Dwd.

Potential Distribution

This distribution map illustrates the climate zones in which this ecosystem type occurs, with stippled areas indicating climate zones where it is rare. It is not present in all parts of its climatic range.

Climate regulation value

The calculator currently lacks appropriate data to calculate the climate regulation value of this ecosystem type.
