

# Hot desert shrubland

**SAMPHIRE SHRUBLAND (*TECTICORNIA TENUIS*)**  
**CENTRAL AUSTRALIA**  
BY MARK MARATHON [PUBLIC DOMAIN], VIA WIKIMEDIA COMMONS

## Vegetation

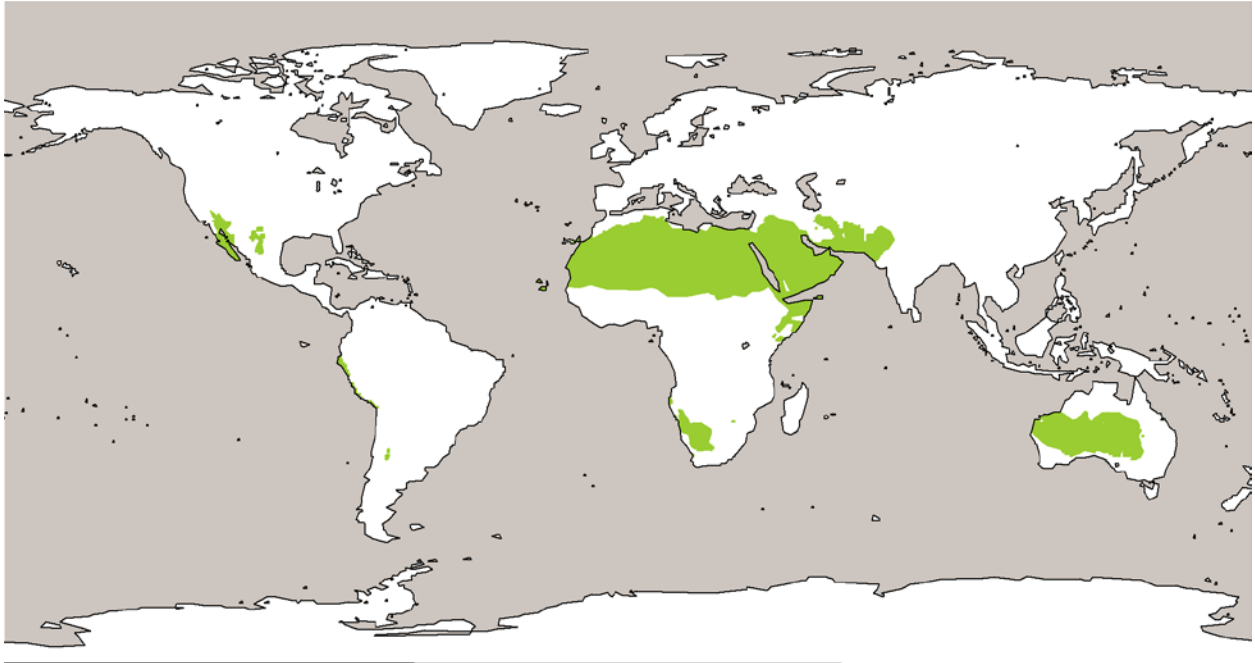

Hot desert shrublands are dominated by shrubs, and are often partially barren.

## Climate

Hot desert shrubland are found in climates with annual precipitation is  $\leq 50\%$  of the potential evapotranspiration and temperatures remain above freezing year-round.

### Potential Distribution

This distribution map illustrates the climate zones in which this ecosystem type occurs, with stippled areas indicating climate zones where it is rare. It is not present in all parts of its climatic range.

## Climate regulation value

The calculator currently lacks appropriate data to calculate the climate regulation value of this ecosystem type.
